METFORMIN HYDROCHLORIDE TABLETS

Version 1.0 — Synthetic Test Label

SYNTHETIC TEST DATA — NOT AN APPROVED PRODUCT LABEL. Created solely to test document extraction and the software workflow. Do not use for prescribing, patient care, regulatory submissions, or clinical decisions.

PRODUCT INFORMATION

Product: Metformin Hydrochloride Tablets
Document purpose: Synthetic software validation input
Comparison scenario: Renal-function monitoring language

BOXED WARNING

Metformin-associated lactic acidosis is a serious but rare adverse reaction. Discontinue metformin if lactic acidosis is suspected. Risk may be increased in patients with renal impairment, hypoxic states, or conditions associated with tissue hypoperfusion.

CONTRAINDICATIONS

Metformin is contraindicated in patients with severe renal impairment and in patients with a known hypersensitivity to metformin.

WARNINGS AND PRECAUTIONS

Assess renal function before initiating treatment and periodically thereafter. Use caution in patients with conditions that may impair renal function.

DOSAGE AND ADMINISTRATION

The dosage should be individualized based on efficacy and tolerability. Follow the prescribing healthcare professional's instructions.

ADVERSE REACTIONS

Common adverse reactions include gastrointestinal symptoms such as diarrhea, nausea, vomiting, flatulence, and abdominal discomfort.

DRUG INTERACTIONS

Certain medicines and clinical conditions may affect renal function or metformin handling. Review concomitant medicines when clinically appropriate.
